# Microsoft Word

**is the word processing component of the Microsoft Office Suite.  
It is used primarily to enter, edit, format, save, retrieve and print documents.**

The area outlined in red is called the title bar.

It displays the names of the open program (in this case Microsoft Word) and the name of the current file.

This file has not yet been saved so its name is Document1.

Files created in Microsoft Word are often referred to as documents *and* have the file extension .doc or .docx

The area outlined in red contains the minimize, maximize/restore and close buttons for the program window.

These three buttons are on almost every window that opens in a Windows based platform.

They are on Mac windows as well, but they are circles instead of squares.

When you click the **minimize** button the program becomes a button on the Windows taskbar located at the bottom of the screen.

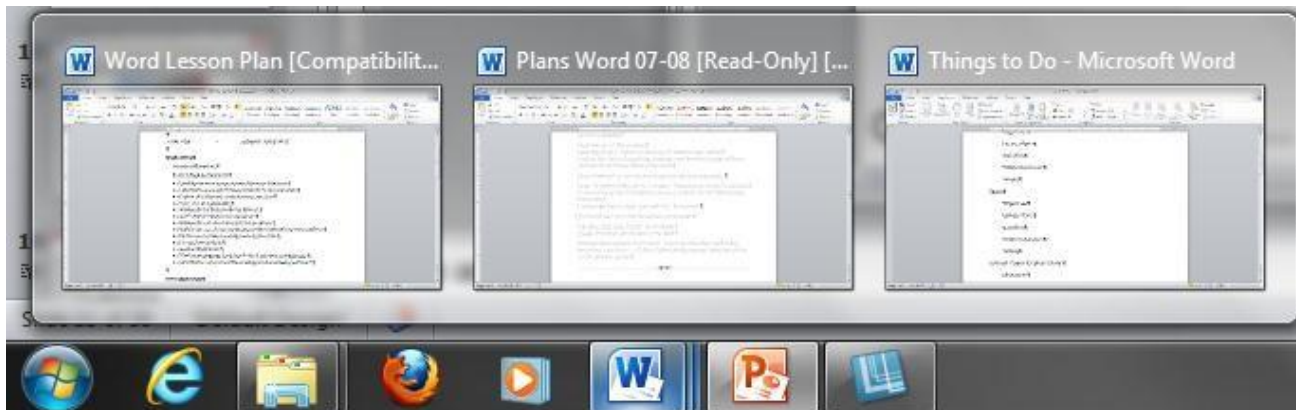

You can restore the document to its original shape and size by either:  
Clicking on the button on the task bar one time to restore it to active mode,

If you have multiple files from the same program open you will need to select the one you want to restore to active mode.

When you click the **maximize / restore** button the program assumes the same shape and size it was before you minimized it.

Or  
The program window will fill the screen.

When you click the **close** button the program will ask you if you want to save the changes if you have made any changes. Once you have responded to this question the program will close.

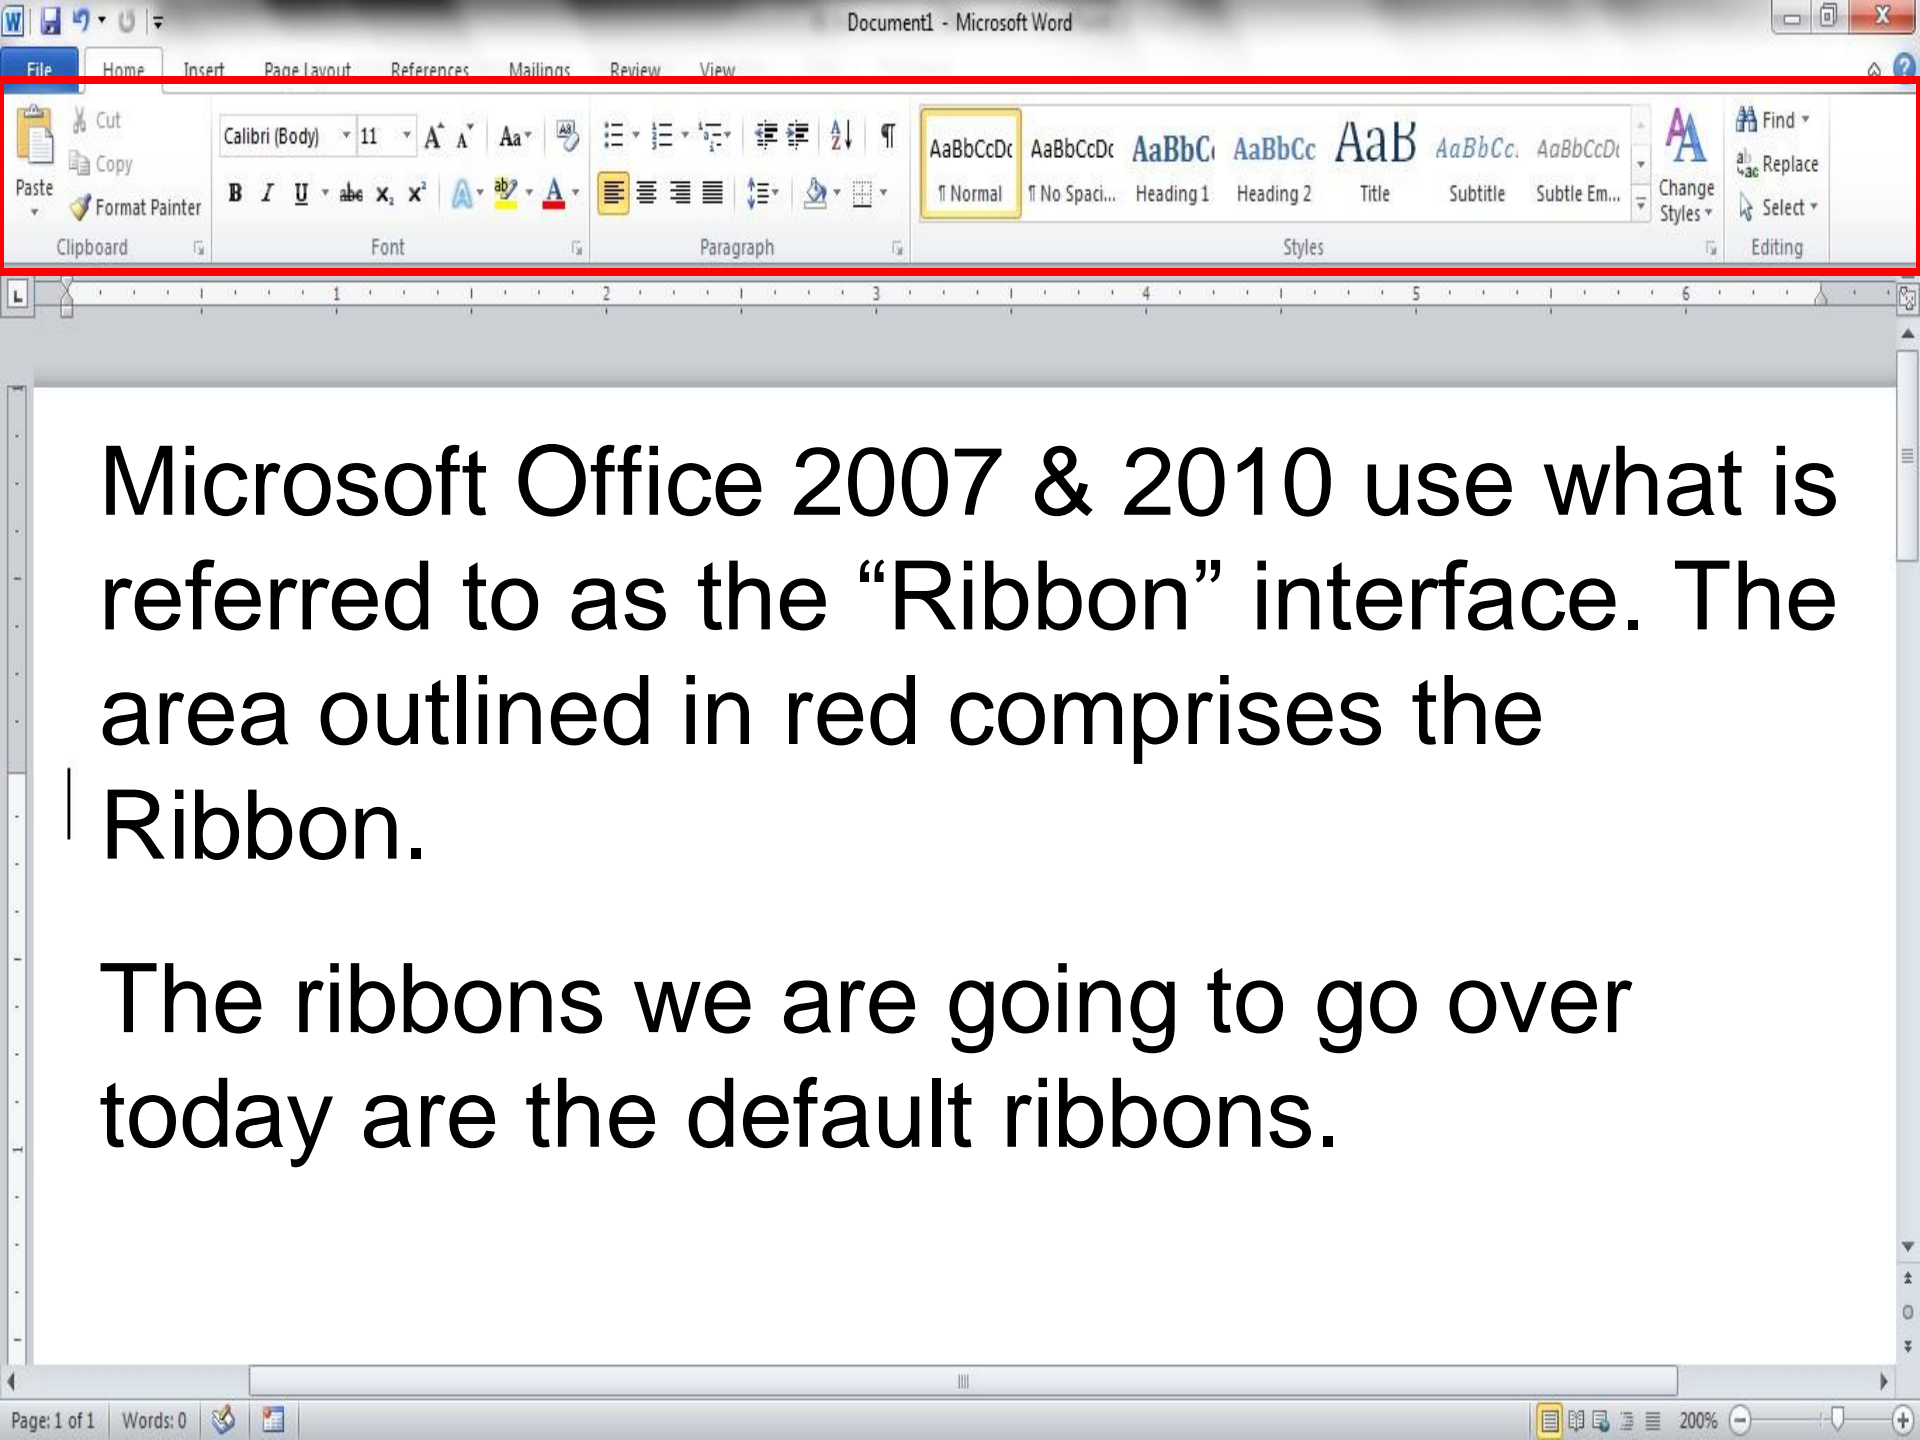

The area outlined in red is called the quick access toolbar.

It contains the most commonly used commands in Microsoft Word:

1. Save
2. Undo
3. Repeat

Microsoft Office 2007 & 2010 use what is referred to as the “Ribbon” interface. The area outlined in red comprises the Ribbon.

The ribbons we are going to go over today are the default ribbons.

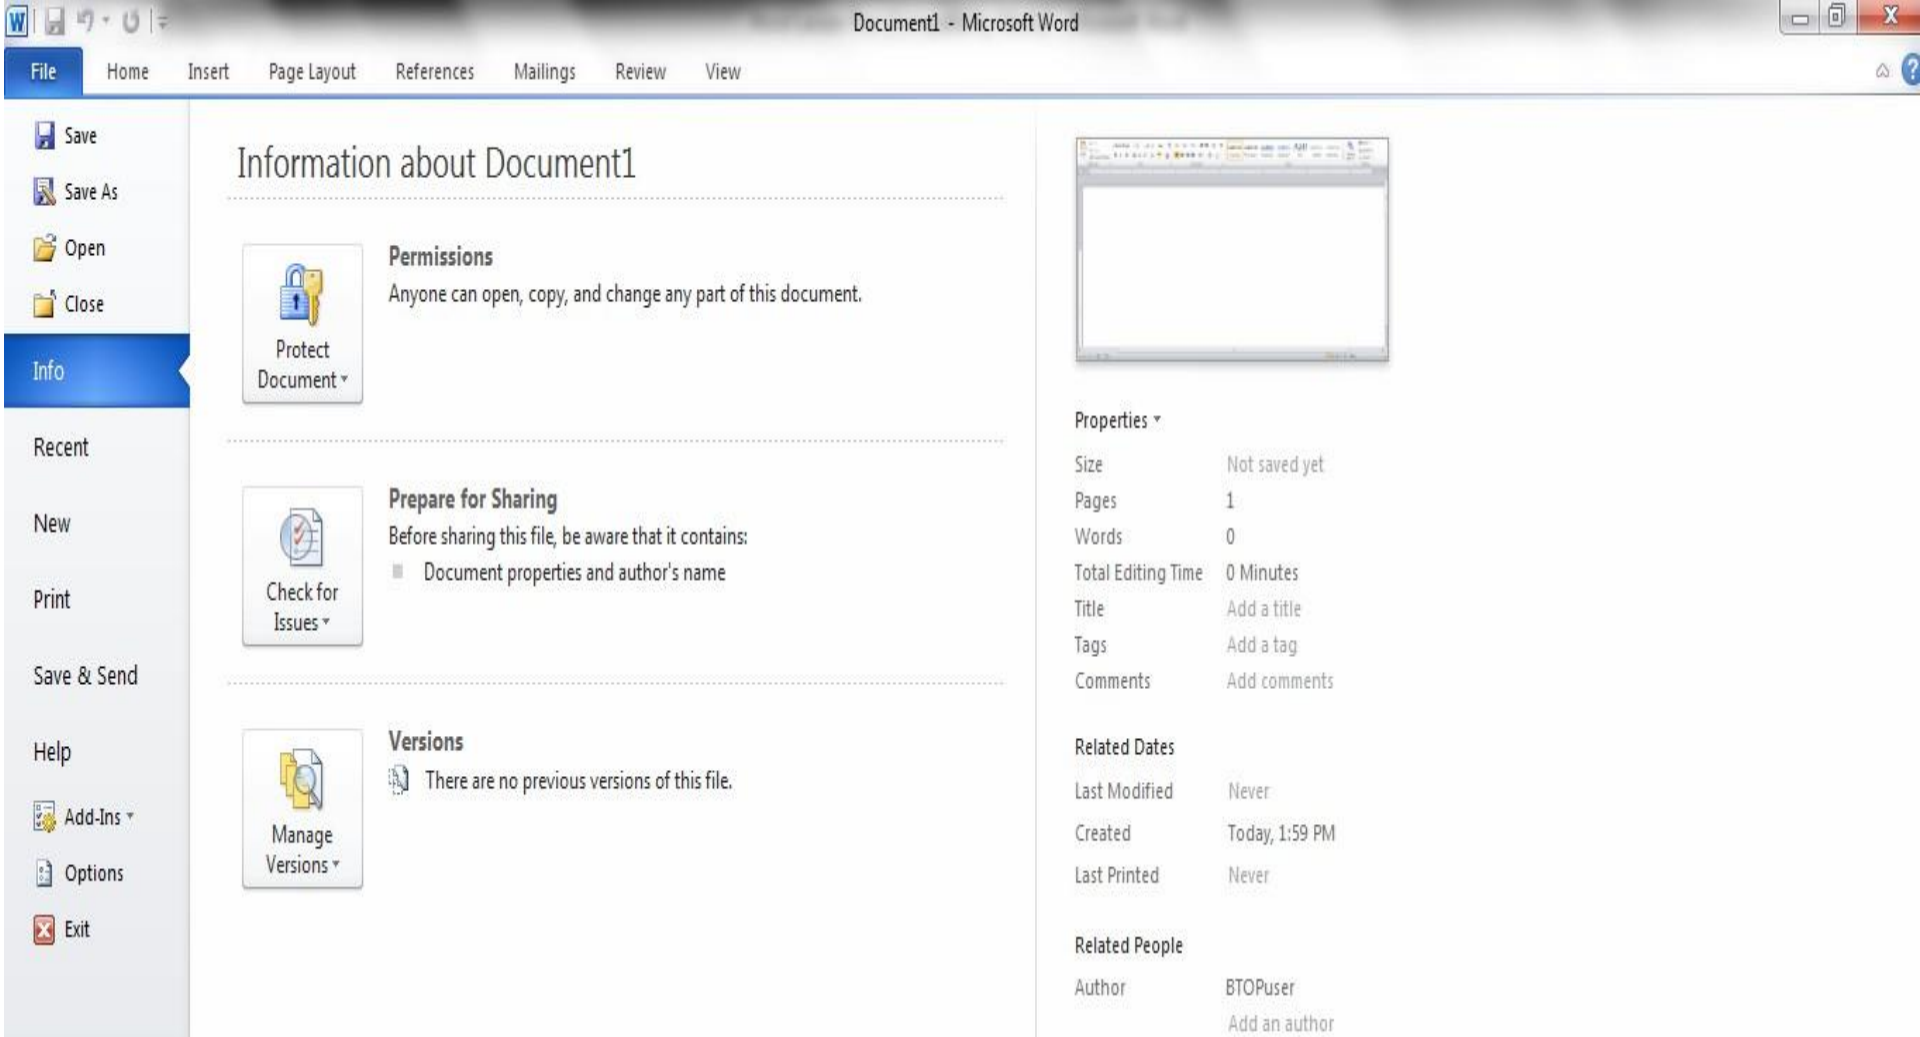

You may customize the ribbon and or a group on the ribbon on your personal computer to have only the features you want to use.

In order to do this all you have to do is right mouse click on the ribbon or the group you want to customize.

The Words File, Home, Insert, etc... outlined in red are referred to as tabs. Each tab has several Groups attached to it.

## Information about Document1

### Permissions

Anyone can open, copy, and change any part of this document.

### Prepare for Sharing

Before sharing this file, be aware that it contains:

- Document properties and author's name

### Versions

There are no previous versions of this file.

### Properties

# Summary

- Word processors have features that make it easy to create documents.
- Consider both the content and look of the document.
- Create copies of documents and back up changes at every opportunity.

# Font Attributes

The image shows a Windows 'Font' dialog box with several callout boxes pointing to specific features:

- Font:** Points to the font name list, which includes 'Times New Roman', 'Sylfaen', 'Symbol', 'Tahoma', 'Tempus Sans ITC', and 'Times New Roman'.
- Color:** Points to the 'Font color' dropdown menu, which is currently set to 'Automatic'.
- Special Effects:** Points to the 'Effects' section, which includes checkboxes for 'Strikethrough', 'Double strikethrough', 'Superscript', 'Subscript', 'Small caps', 'All caps', and 'Hidden'.
- Style:** Points to the 'Font style' list, which includes 'Regular', 'Italic', 'Bold', and 'Bold Italic'.
- Size:** Points to the 'Size' list, which includes '8', '9', '10', '11', and '12'.
- Preview:** Points to the preview area at the bottom, which shows the text 'Times New Roman' in the selected font and size.

At the bottom of the dialog box, there are buttons for 'Set As Default', 'Text Effects...', 'OK', and 'Cancel'.
